

# Declaration of Revolutionary Internationalists following the anti-war Prague Congress, May 2024:

Against Capitalist Wars and Against Capitalist Peace!

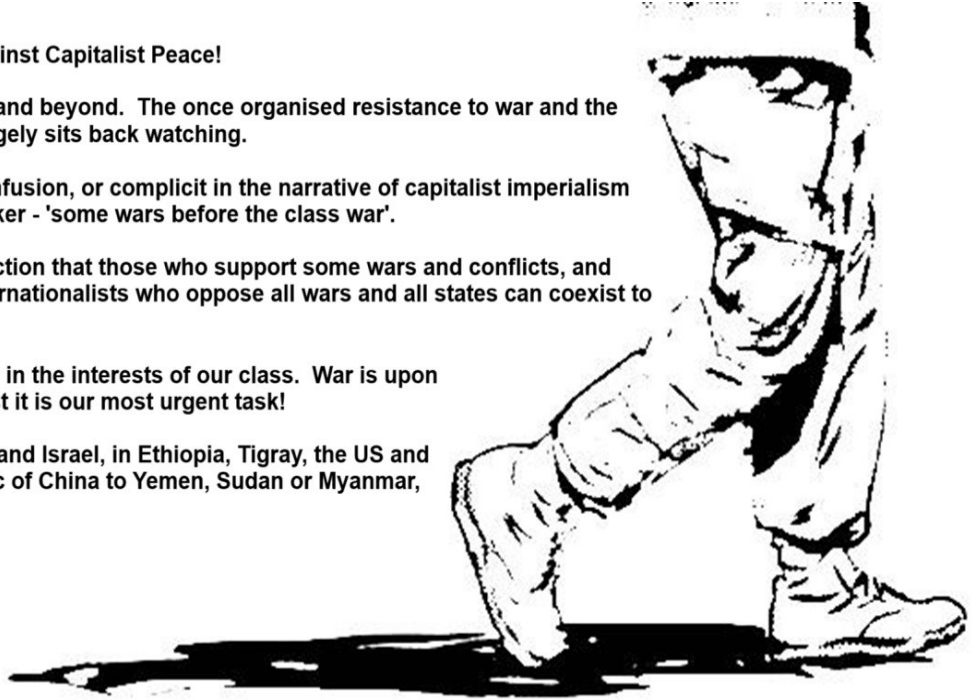

A spectator is haunting Europe and beyond. The once organised resistance to war and the oppression of our class now largely sits back watching.

Paralysed by cowardice and confusion, or complicit in the narrative of capitalist imperialism that pitches worker against worker - 'some wars before the class war'.

This paralysis arises from the fiction that those who support some wars and conflicts, and consequently the state, and internationalists who oppose all wars and all states can coexist to preserve a false unity.

This false unity must be broken in the interests of our class. War is upon us now and our struggle against it is our most urgent task!

In Ukraine and Russia, in Gaza and Israel, in Ethiopia, Tigray, the US and Iran, from the People's Republic of China to Yemen, Sudan or Myanmar, our class has no nation!

**On the home front and internationally:**

**Refuse their Social Peace and their drive to global war! No War But The Class War!**
